Beta Tester Manual

A step-by-step guide for testing the fairflow merchant and admin experience.

PREPARED FOR

Sobuhle Nyambali

Co-founder & CEO — Beta Test Lead

Date: March 2026
Version: Beta 1.1
Site: fairflow.co.za

WHAT YOU WILL TEST

1. Merchant signup
2. Create a product
3. Consumer purchase
4. Order appears for merchant
5. KYC submission
6. Admin KYC approval
7. KYC email confirmation
8. Admin payout release

Setup & Getting Started

BROWSER SETUP

Browser 1 (Chrome) — Merchant role
Browser 2 (Incognito/Firefox) — Consumer & Admin
Keep both windows open side by side
Do NOT use the same session for both roles
Incognito has no cached data — use it for clean tests

WHAT YOU NEED

Your admin credentials (you already have these)
A real email address to receive KYC email
PayStack test card: 4084 0840 8408 4081
Expiry: 12/26 CVV: 408
A chosen test password (something unique)

NOTE: Use the PayStack TEST card only — no real money moves during beta testing.

1. Merchant Signup — Browser: Chrome

You are a brand-new merchant signing up for the first time.

1. **Go to the register page**
   fairflow.co.za/merchant/register — open in Chrome
2. **Fill in the form**
   Business name: Test Merchant Co | Email: your real email | Password: [your chosen password]
3. **Confirm password**
   Re-enter your chosen password then click Register
4. **Verify landing**
   You should land on the merchant dashboard at /dashboard/merchant

CHECKPOINTS:

+ Page loads with dark navy background — no white flash or broken layout
+ Registration form shows all fields correctly
+ After clicking Register you arrive at the merchant portal

2. Create a Product — Browser: Chrome (still logged in)

Add your first product to the store. This generates a shareable product link.

1. **Click Products tab**
   Find Products in the merchant portal navigation
2. **Click + Create Product**
   Find the lime green Create Product button and click it
3. **Fill product details**
   Title: Test Product | Price: 150 | Stock: 10 | Category: any
4. **Add image**
   Click Choose File and select any small image from your device
5. **Submit the form**
   Click Create/Save — product should appear in the list
6. **Copy product link**
   Find the product URL in the list — you need it for Section 3

CHECKPOINTS:

+ Create Product button is visible and lime green
+ Product appears in the list after submitting
+ Product URL starts with https://fairflow.co.za — NOT localhost

3. Consumer Purchase — Browser: Incognito / Firefox

Switch to incognito. You are now a customer buying the product.

1. **Open product link in incognito**
   Paste the product URL from Section 2 into the incognito browser
2. **Verify product page**
   Should show: Test Product, price R150, uploaded image
3. **Click Buy Now**
   Click the purchase button — you will go to PayStack
4. **Enter test card**
   Card: 4084 0840 8408 4081 | Expiry: 12/26 | CVV: 408 | Name: Test Consumer
5. **Complete payment**
   Follow PayStack prompts — use OTP 123456 if asked
6. **Verify confirmation page**
   You should land on an order confirmation page at fairflow.co.za

PAYSTACK TEST CARD DETAILS

Card number: 4084 0840 8408 4081
Expiry: 12/26 CVV: 408 Name: Test Consumer
OTP (if asked): any 6 digits e.g. 123456
This is a TEST card — zero real money involved

CHECKPOINTS:

+ Product page loads with correct name and price (R150)
+ PayStack payment page loads without error
+ Payment completes and you reach an order confirmation page on fairflow.co.za

NOTE: If payment fails — note the exact PayStack error code and continue to Section 4.

4. Order Appears for Merchant — Browser: Chrome

Switch back to Chrome. Verify the order from the consumer purchase appears in the merchant portal.

1. **Click Orders tab**
   In the merchant portal, click the Orders tab in the navigation
2. **Find the order**
   Look for an order with amount R150 — should appear within seconds of payment
3. **Read the status badges**
   You should see a green Paid badge and a Fulfilment Pending badge
4. **Click into the order**
   Click the order to view its full details and product name

CHECKPOINTS:

+ Orders tab loads without error
+ The R150 order appears with a green Paid badge
+ Order shows Fulfilment Pending badge and product details

NOTE: If the order is missing — note this (webhook issue). Continue to Section 5 — KYC can be tested independently

5. KYC Submission — Browser: Chrome (merchant portal)

Before payouts are enabled, the merchant must complete KYC verification.

1. **Click KYC & Payouts tab**
   Find and click the KYC & Payouts tab in the merchant portal
2. **Personal details**
   Full name: Test Merchant | ID number: [any valid-format SA ID] | DOB: 1980-01-01
3. **Contact details**
   Phone: 0821234567 | Address: 123 Test Street, Johannesburg
4. **Banking details**
   Bank: FNB | Account: 62012345678 | Type: Cheque
5. **Submit KYC form**
   Click Submit KYC — should be a lime green button
6. **Note status change**
   Status should update to Pending Review after submission

NOTE: Use fictitious test data only. Do not use real SA ID numbers or real banking details in beta testing.

CHECKPOINTS:

+ KYC form is visible and all fields are legible
+ Submit KYC button is clearly visible and clickable
+ Status changes to Pending Review after submission

6. Admin KYC Approval — Browser: Incognito (admin portal)

Switch to incognito. Log into the admin portal using your admin credentials.

NOTE: Admin access: if not already logged in, go to fairflow.co.za/login first. After login you land at /dashboard

1. **Navigate to the admin portal**
   If already logged in go directly to: fairflow.co.za/dashboard/admin
2. **Log in with admin credentials**
   If not logged in: go to /login first, sign in, then navigate to /dashboard/admin
3. **Click KYC Approvals**
   In the admin sidebar, click KYC Approvals
4. **Find pending submission**
   Look for Test Merchant in the pending KYC list
5. **Click Approve**
   Click the Approve button on the Test Merchant row
6. **Confirm approval**
   Submission should move out of pending or show as Approved

CHECKPOINTS:

+ Admin portal loads with dark navy theme
+ KYC Approvals tab shows the Test Merchant submission
+ After approving, submission leaves the pending list

7. KYC Approval Email — Check your email inbox

1. **Open your email inbox**
   Check the email address used to register in Section 1
2. **Find the KYC approval email**
   Subject: "Your Fairflow KYC has been approved" (or similar)
3. **Check spam if needed**
   If not in inbox within 5 minutes, check spam / junk folder

8. Admin Payout Release — Browser: Incognito (admin still logged in)

After KYC approval and a completed order, a payout is ready for admin release.

1. **Click Payouts tab in admin**
   In admin sidebar — look for Payouts tab (after Financials)
2. **Find the pending payout**
   Test Merchant Co with amount based on R150 minus 3% platform fee
3. **Click Release**
   Click the Release button on the payout row
4. **Confirm in dialog**
   Dialog shows: "Release R[amount] to Test Merchant Co?" — confirm
5. **Verify success**
   Success message appears, payout leaves the pending list
6. **Switch to Chrome (merchant)**
   Go to KYC & Payouts tab — payout should appear in history with gross/fee/net

CHECKPOINTS:

+ Payouts tab exists in admin navigation
+ Pending payout for Test Merchant appears with correct amount
+ Confirmation dialog shows the right amount and name
+ Merchant sees the released payout with gross/fee/net breakdown

NOTE: Payout list empty? Connected to webhook issue in S4. Note both failures together.

Results Scorecard — P = Pass F = Fail N = Not tested

1a	Register page loads correctly		5a	KYC form visible & legible	
1b	Lands on portal after signup		5b	KYC submits successfully	
2a	Create Product button visible		5c	Status changes to Pending Review	
2b	Product appears in list		6a	Admin shows KYC submission	
2c	Product URL is fairflow.co.za		6b	Approve button works	
3a	Product page loads for consumer		7a	KYC approval email arrives < 5 min	
3b	PayStack payment completes		7b	Email mentions payouts unlocked	
3c	Order confirmation page loads		8a	Payouts tab in admin navigation	
4a	Order appears in merchant Orders tab		8b	Pending payout appears	
4b	Order shows Paid + Fulfilment badges		8c	Release + dialog + success works
