Merchant User Manual

Everything you need to get your products online, manage orders, get verified, and receive payouts.

WHAT'S INSIDE

1. **Getting Started**
   Sign up and navigate your dashboard
2. **Your Products**
   Add, manage, share and archive products
3. **Your Orders**
   Track, fulfil, and understand order status
4. **Analytics**
   Understand your store performance
5. **KYC Verification**
   Get verified to unlock payouts
6. **Payouts**
   Track earnings — gross, fee, and net
7. **Account Settings**
   Update your business profile

Need help?

This manual covers everything for beta. If something looks wrong, note it and contact the team.

Chapter 1 — Getting Started

SIGN UP — NEW MERCHANT

Go to: fairflow.co.za/merchant/register
Fill in: Business name, email, password
Or click: Sign in with Google
You land on your merchant dashboard

LOG IN — RETURNING MERCHANT

Go to: fairflow.co.za/merchant/login
Enter your email and password
Or click: Sign in with Google
You land on your merchant dashboard

NOTE: Your session stays active for 7 days. You will be signed in automatically on return visits.

1. Your Merchant Dashboard

After logging in, you will see your dashboard. Here is what each tab does:

Products
Add, edit, archive and manage your product listings

Orders
View and fulfil orders from customers

Analytics
See views, clicks and sales data for your store

Notifications
Platform alerts, order updates and messages

KYC & Payouts
Submit verification documents and track earnings

My Account
Update your business name, phone and address

2. Navigating the Portal

1. **Find the sidebar or top navigation**
   The portal has tabs — Products, Orders, Analytics, Notifications, KYC & Payouts, My Account
2. **Click a tab to switch sections**
   Each tab loads instantly — no page reload needed
3. **Sign out when done**
   Click Sign Out in the navigation to log out safely

TIPS FOR BETA TESTERS:

+ If a page looks broken or has a white background — note it and take a screenshot
+ If a button does nothing when clicked — note which button and which tab
+ If you see an error message — write down the exact text

Chapter 2 — Your Products

1. Adding a New Product

1. **Click the Products tab**
   Find Products in the merchant portal navigation and click it
2. **Click + Create Product**
   Click the lime green Create Product button
3. **Fill in product details**
   Title, Price (in Rands), Stock quantity, Category — all required
4. **Add a product image**
   Click Choose File and select an image from your device (JPG or PNG)
5. **Add a description**
   Write a short description of the product for customers
6. **Click Create / Save**
   Submit the form — product appears in the list
7. **Copy your product link**
   Find the product in the list and copy the shareable URL to send to customers

PORTABLE PRODUCT IDENTITY

Each product gets a matter:// URI — a portable identifier that works in any browser.
Click Copy Link in the product row to copy the shareable URL. This link is permanent — even if you update the product, the same link still points to it. You can also copy the matter:// URI for portability.

ARCHIVING A PRODUCT

Find the product in your Products list
Click the Archive (delete) icon on the row
Confirm — product moves to archived state
Important: the product link still opens but shows "no longer available" — no Buy button

EDITING A PRODUCT

Find the product in your Products list
Click the Edit icon or product name
Update any field and click Save
Price, stock count, description can all be edited

Chapter 3 — Your Orders

1. Managing Customer Orders

1. **Click the Orders tab**
   Go to the Orders tab in the merchant portal
2. **View your orders**
   Each row shows customer, product, amount (ZAR), date, and two status badges
3. **Read the status badges**
   Payment badge (green = paid, yellow = pending, red = failed) + Fulfilment badge
4. **Upload a shipment slip**
   Before you can mark shipped, upload proof — click Upload Slip on the order row
5. **Click Mark as Shipped**
   After uploading the slip, the Mark as Shipped button activates — click it
6. **Customer is notified**
   fairflow sends an automatic notification to the customer when you mark shipped

ORDER STATUS — TWO BADGES PER ORDER

- **Paid** — Payment confirmed by PayStack
- **Payment Pending** — Payment initiated, not yet confirmed
- **Payment Failed** — Payment unsuccessful
- **Fulfilment Pending**
- **Shipped**

Chapter 4 — Analytics

1. Understanding Your Store Performance

The Analytics tab shows you how customers are interacting with your products.

Product Views	Clicks	Purchases	Conversion
How many times customers opene	How many times customers click	How many completed payments yo	Percentage of viewers who actu

NOTE: Analytics data updates every time a customer views or buys. Check it daily to see what is working.

Chapter 4b — Notifications

WHAT YOU WILL BE NOTIFIED ABOUT

- New order received from a customer
- Payment confirmed by PayStack
- KYC status update (approved or rejected)
- Payout released to your bank account
- Product sold out (stock reaches zero)

HOW NOTIFICATIONS WORK

- Bell icon in the top nav shows unread count
- Click the bell to view all notifications
- Each notification links to the relevant section
- Important ones (orders, payouts) also arrive by email

Chapter 5 — KYC Verification

1. Why You Need KYC

KYC (Know Your Customer) is a legal requirement before fairflow can release payments to your bank account.
You can sell and receive orders before KYC, but payouts are only released once your identity is verified.

2. How to Submit Your KYC

1. **Click KYC & Payouts tab**
   Find and click KYC & Payouts in the merchant portal
2. **Fill in personal details**
   Full legal name, South African ID number, date of birth
3. **Fill in contact details**
   Phone number, physical address
4. **Fill in banking details**
   Bank name, account number, account type (Cheque/Savings)
5. **Click Submit KYC**
   Click the Submit KYC button — it is lime green and clearly labelled
6. **Wait for review**
   fairflow admin reviews your submission within 1-2 business days
7. **Check your email**
   You will receive an email when your KYC is approved or if more info is needed

KYC STATUS

Not submitted	Pending Review	Approved	Rejected
You have not filled in the KYC form yet	Your submission is with the fairflow team	Verified — payouts are now enabled	More information required — check your email

Chapter 6 — Payouts

1. How Payouts Work

When a customer pays, fairflow holds the funds until admin releases them to your bank account.
fairflow charges a 3% platform fee on each sale. Payout amounts shown are net of this fee.

Order placed	>	Payment confirmed	>	Order shipped	>	KYC approved	>	Payout released
1		2		3		4		5

2. Payout Breakdown — Gross, Fee, Net

Each payout record shows the full breakdown so you always know exactly what was deducted.

EXAMPLE: R150 sale

Gross sale amount	R150.00
fairflow platform fee (3%)	- R4.50
Net payout to you	R145.50

1. **Click KYC & Payouts tab**
   Navigate to the KYC & Payouts section in the merchant portal
2. **Scroll to Payout History**
   Below the KYC form, find the Payout History section
3. **Read the breakdown**
   Each row shows: Gross | Fee (3%) | Net | Date | Status
4. **Check payout status**
   Released = money sent to your account | Pending = waiting for admin

PAYOUT AMOUNTS

You receive the net amount after the 3% fee
Example: R500 order → R15.00 fee → R485.00 to you
PayStack payment fees are separate (1.5%)
All amounts shown in South African Rand (ZAR)

PAYOUT TIMING

Payouts are released manually by the admin team
Typical timing: within 2-3 business days of shipment
You receive an email notification when released
Banking transfers may take 1-2 days to reflect

Chapter 7 — Account Settings

1. Updating Your Business Profile

1. **Click My Account tab**
   Find My Account in the merchant portal navigation
2. **View your current details**
   Your business name, email, phone and address are shown
3. **Edit any field**
   Click into a field and type your updated information
4. **Click Save Changes**
   Click the Save Changes button — a green message confirms success

WHAT YOU CAN UPDATE

Business name — The name shown on your product pages and receipts
Phone number — Your contact number for order queries
Address — Your business or delivery address

Beta Feedback & Quick Reference

1. How to Report Issues During Beta

Note anything that feels wrong, broken, or confusing — every finding helps.

WHAT TO LOOK OUT FOR

Buttons that do nothing when clicked
Pages with white or broken backgrounds
Forms that do not save your input
Error messages — note the exact text
Missing features you expected to find

HOW TO REPORT

1. Write down the exact issue
2. Note which tab it happened on
3. Take a screenshot if possible
4. Note expected vs actual behaviour
5. Send to Matome via WhatsApp or email

2. Common Questions

Q: Why can I not receive payouts yet?
A: KYC must be approved first. Go to KYC & Payouts and check your status.

Q: Why is my archived product link still opening?
A: Archived links stay live but show "no longer available" — no Buy button. This is correct.

Q: How long does KYC approval take?
A: fairflow reviews within 1-2 business days. You will receive an email either way.

Q: Why does Mark as Shipped stay greyed out?
A: You must upload a shipment slip first. The button activates after the slip is uploaded.

Q: What does the 3% fee apply to?
A: It applies to the gross sale amount. Example: R500 sale = R15 fee = R485 net to you.

QUICK REFERENCE

Sign up	fairflow.co.za/merchant/register	**Products**	Dashboard > Products tab
Log in	fairflow.co.za/merchant/login	**Orders**	Dashboard > Orders tab
Dashboard	fairflow.co.za/dashboard/merchant	**KYC & Payouts**	Dashboard > KYC & Payouts tab
Analytics	Dashboard > Analytics tab	**My Account**	Dashboard > My Account tab

Welcome to fairflow beta.

Thank you for being one of the first merchants on the platform.
Your feedback shapes what fairflow becomes. — The fairflow team
